

**SENSA**

collection 2025

## OUR HISTORY

Our Sensa story starts with Intersens Bikes & Parts BV. A family owned company located in the beautiful east of Holland. Here we have been building and developing high-quality sportive bikes for over 30 years.

Intersens has its roots in trading and developing different types of goods. After having originated in America during the 80's the first mountain bikes appeared in Holland. As a former amateur road cyclist Pieter Stiggelbout, founder of Intersens, noticed the potential. He traveled to Asia to purchase the first mountain bikes. In a time without e-mail or internet that was a huge challenge but in 1991 our first mountain bikes were imported. They were not branded Sensa yet though.

For us everything came together in 2005. This was the time to make our next move and express our personal passion for cycling and it's material with the launch of the Sensa brand! At first a small range of custom built and high quality road racing bikes was offered. In the years that followed our line-up grew. We developed custom built mountain bikes and trekking bikes to complement our race bike line-up. Using techniques we also used for our road race bikes.

## HANDBUILT IN HOLLAND

Our company and products keep evolving through innovation up to this day. From our first Sensa bike in 2005 till now all our bikes are built in Holland. If you order a custom bike, this will be built by one of our skilled mechanics, who builds your bike from start to finish.

## JOOP'S DREAM

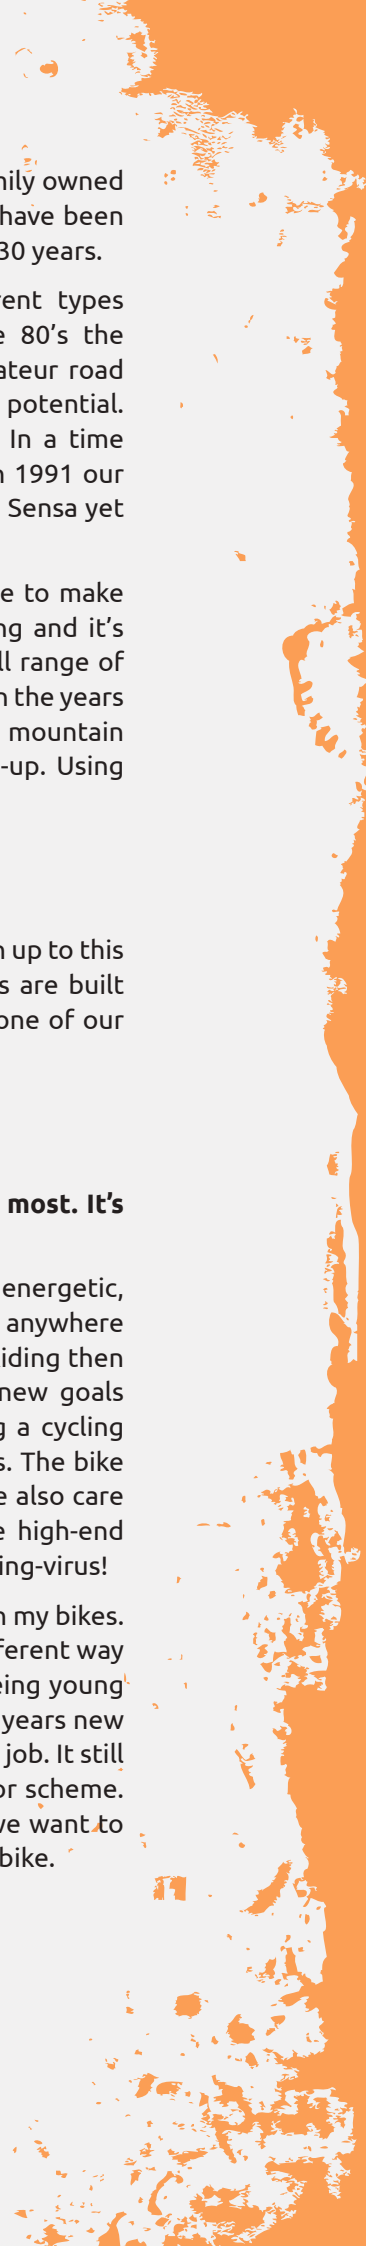

**It's not the latest sportive bike people buy that matters most. It's the first!**

That first bike is the start of a richer life. To be more fit, more energetic, simply better than before. That bike gives you freedom to go anywhere you want with just your own power. Bikes are so versatile. Riding then never gets boring. There are always new routes to ride, new goals to reach. Whether you train hard in the hope of becoming a cycling professional or make a small ride just to enjoy the outdoors. The bike stands for freedom, every time you get on it! That's why we also care about the more affordable alloy models, and not just the high-end custom bikes. It's that first bike that can really spark the cycling-virus!

When I was young I already felt the need to change things on my bikes. To make it more "me". Combining stock components in a different way or adapting colors. The thrill of creating something new. Being young I was already asked about what colors I liked to see on next years new bikes. Growing up I got the chance to make this into my daily job. It still is very exciting to create a new frame, a component or color scheme. We know many riders share this passion for their bike. So we want to give them an experience in creating a truly personal custom bike.

***„My dream is to see everybody enjoy riding the Sensa of their dreams.“***

Joop Stiggelbout  
managing director

*Making excellent sportive bikes for excellent prices.  
So everybody can enjoy cycling!*

## CUSTOM BUILT YOUR BIKE!

Our unique custom program gives you the opportunity to customize the bike to your preference. Because you are unique, the bike has to be unique! Multiple options from the best brands are available to really customize your new Sensa!

You start your custom journey at your Sensa dealer or on our brand new bike configurator at our website! Are you going for the Giulia Supremo, Giulia GF or Giulia Evo Integrale? Everything is possible! After this step you can choose between the best groupsets, wheel-sets, handlebars, tires and many more! You can find all the options on page 16 or in our new bike configurator on our brand new website!

After you customized your unique new bike we receive your configuration in our headquarters in the Netherlands. The warehouse collect all the parts for our team of skilled mechanics who are specially trained to build custom bikes. A single bike is built by a single mechanic who is proud to give his stamp of approval after finishing it. After sending it to your Sensa dealer you are ready to ride and break all your personal records!

## SENSA KANJERS VOOR KANJERS CYCLING TEAM

Did you know we are the proud main-sponsor of the Sensa Kanjers voor Kanjers Cycling Team. This team plays a big role in the development of young talents with multiple national titles and riders who are now riding in the pro peloton. It's possible to customize your new bike like they did with the Giulia Supremo!

# GIULIA SUPREMO

## FASTER LIGHTER BETTER | SENSА GIULIA SUPREMO

It was our dream to create a bike that was faster, lighter and more comfortable than the Giulia Evo Integrale. Using the latest CFD-technology we found improvements on the Giulia Evo Intagrale and optimized each tube section. Lessons learned from the Giulia GF were applied to make the bike lighter and more comfortable.

We were able to improve drag reduction\* by 9.1 %. Giving you an advantage of 1,5% watt saving\*. Comfort\* was improved by 30%. Finally the weight dropped by 278 gram on the frame-kit (including seatpost, axles, dropouts etc). Numbers are nice, but the confirmation the testrides gave us was even better.

We present you our best roadbike ever!

## GIULIA SUPREMO, YOUR DREAMBIKE.

You are unique! And your bike should reflect that. So every custom Sensa is built to order specially for you by one of our mechanics. Our finest road bikes are offered as custom bikes with many different groupsets to choose from. Multiple options are available to really customize your new Sensa.

### LIMITED

Want to stand out from the crowd? We offer the Giulia Supremo in a special "Limited" color scheme. This color scheme is painted in limited numbers only, to make your already unique custom bike extra special.

**Frame** Generation 5 Full Carbon – EPS Moulding – CFD Optimized \ \ **Fork** Supra Full Carbon Monocoque – AIRflow 2 \ \ **Seatpost** Supra Race Line Carbon – Evo – 15mm offset

\*Read all the details in the White Paper on the website.

# GIULIA GF

## THE ULTIMATE ALL-ROUNDER | SENSА GIULIA GF

Only 2 letters, G and F, but unlimited possibilities. This Generation Four of the original Giulia is still true to the initial idea of helping you realizing “gold” in your favorite Grand Fondo. But it does so much more. We designed it to be flexible in use. So you can run up to 32mm of rubber and have Great Fun on a gravel road, a cobblestone adventure or any road you would normally avoid. Find new routes and stay motivated through the winter to reach peak performance for your big goals in the summer. The newly designed rear triangle makes it our most comfortable road bike ever, so you will finish whatever you come up with, with a big smile. Of course the headtube and BB-stiffness boxes are ticked as always. We took the Aero-tubing profile of the Giulia Evo and improved on that. With EPS Moulding Techniques we create internal surfaces as smooth as the exterior, thus using less material to keep the weight low. Finally all the cables run into the headtube (except mechanical shifting), creating an ultra-clean look. The GF can be run with the Supra Combo Integrale or any regular stem. You decide! The complete overhaul of the geometry takes into account the bigger tires and makes it suitable for comfortable riding up to racing. In the end this is still a bike to Go Fast on!

**Frame** Generation 5 Full Carbon – EPS Moulding  
**Fork** Supra Full Carbon Monocoque - AIRflow \\  
**Seatpost** Supra Race Line GF Carbon – 27.2x370

## GIULIA GF, A TRUE RACER WHICH YOU WILL LOVE.

You are unique! And your bike should reflect that. So every custom Sensa is built to order specially for you by one of our mechanics. Our finest road bikes are offered as custom bikes with many different groupsets to choose from. Multiple options are available to really customize your new Sensa.

### LIMITED

Want to stand out from the crowd? We offer the Giulia GF in special “Limited” color schemes. This color scheme is painted in limited numbers only, to make your already unique custom bike extra special.

**GIULIA EVO INTEGRALE**

**THE NEED FOR SPEED  
SENSA GIULIA EVO INTEGRALE**

We took the Giulia Evo Disc to the next level. Bringing all the hoses internally and raising the headtube stiffness. To give you just that little advantage to be first at the finish line, or at the coffeehouse.

We designed the bike to perform optimal with 25mm tires. But it can take up to 30mm of rubber. So you can adapt the bike to ride on multiple surfaces. The rear-triangle is altered so the new 12speed groupsets have got additional clearance between chain and dropout. What has not been changed is the fast handling geometry of its predecessor and the smile it brings when you put the hammer down and enjoy the speed!

**GIULIA EVO INTEGRALE,  
BUILT TO GO FAST.**

You are unique! And your bike should reflect that. So every custom Sensa is built to order specially for you by one of our mechanics. Our finest road bikes are offered as custom bikes with many different groupsets to choose from. Multiple options are available to really customize your new Sensa.

**Giulia Gravel has road and cyclocross in its DNA.**

But with a geometry that's more comfortable. The longer reach and higher stack combined with a slacker headtube offers more control and relaxed steering. You can mount mudguards, a toptube storage, and 3 large water bottles if you like. You can fit up to 47mm of rubber.

The bike is super easy-to-service. So you can go explore, commute or simply put the hammer down anywhere you are.

**NEXT LEVEL INTEGRATION | SUPRA COMBO AERO**

For the Giulia Supremo we created the Combo Aero. Using our existing adapters and puzzle spacers it is purpose built for full internal cablerouting. The smooth shapes are more aerodynamic than its predecessor the Combo Integrale. It is also more ergonomic. The underside is a big continuous tunnel which allows cables to be guided super easy. Changing bars can be done without detaching the brakehose from the lever. To keep things tidy there is a cover which mounts easy and allows the slideable Garmin-holder or the Raceday FI hide-my-bell to be mounted.

The bend has been reshaped. Creating a dual flare, so the bar is more narrow at the hoods than at the outers and the slight outward position of the lower part gives more room for the wrist while sprinting.

The topcap can be replaced by any standard round spacer, so it's possible to keep some additional length to your steerer, to finetune your position. Finishing off with 3D grip bumps on top of the bars for additional grip the Combo AERO is ready to go.

It's offered in 4 sizes all with a nicely compact bend (75mm reach, 126mm drop).

## SUPRA COMBO INTEGRALE

### NEXT LEVEL INTEGRATION | SUPRA COMBO INTEGRALE

To further personalize your bike we created the Combo Integrale. Using a special Evo adapter and Evo spacer-kit it integrates neatly into the Giulia frames. But it can be used on other bikes as well. To fit to bikes with standard headtubes (+- 46mm wide) we offer the "combo-to-standard adapter". This adapter is also compatible with the Evo spacer-kit. The latest "Integrale" version also allows for full internal cablerouting as used on our Giulia GF, Giulia Evo Integrale and Giulia Supremo. But it is still backwards compatible with cables running outside of the headtube. For when running full internal cables we developed a new Integrale adapter + base spacer and puzzle spacers. So you can change riding-height swiftly.

The angular styled full carbon 1-piece bar-stem is easy in everyday life. It has got removable cover plates to keep maintenance on your bike more easy. The flat top ensures a clean and tidy outlook when riding your bike.

The Combo comes with an Integrated Topcap and a special Exit-hole Topcap, so you can ride with a longer steerer before cutting the steerer to the perfect length. We also offer a slideable Garmin-holder and an a Raceday FI hide-my-bell version of the Garmin-holder.

It's offered in 5 sizes (90x40 - 100x42 \* - 110x42 - 120x44 - 130x44) all with a nicely compact bend (75mm reach, 126mm drop, 2 ° flare) and at \* 385gram it is lightweight. It's compatible with the Shimano RS-910 Di2 junction.
